# CHAPTER 01: INTRODUCTION

## Background of the organization

LankaBangla Finance Limited (LBFL) stands as a prominent financial institution that has been at the forefront of providing comprehensive financial services in Bangladesh. Established with a vision to empower individuals and businesses with innovative financial solutions, LBFL has carved a niche for itself in the country's financial landscape.

Founded in [year], LBFL has steadily grown into a diversified financial conglomerate, offering a wide array of services that cater to the diverse needs of its clientele. The company's commitment to excellence, coupled with its customer-centric approach, has propelled it to become a trusted partner for financial services.

### Services and Offerings:

LBFL's service portfolio encompasses a range of financial products and solutions, each tailored to meet the specific requirements of its customers. The company's offerings include:

**Retail Banking:** LBFL offers a comprehensive range of retail banking services, including savings and current accounts, fixed deposits, and personalized investment options. These offerings are designed to help individuals achieve their financial goals while ensuring their funds are secure and well-managed.

Consumer Loans: The institution provides consumer loans to enable customers to fulfill various aspirations, such as purchasing homes, vehicles, or funding higher education. These loans are characterized by competitive interest rates and flexible repayment terms.

Corporate Financing: LBFL extends its support to businesses through a variety of corporate financing solutions. These encompass working capital loans, trade finance, and project financing, contributing to the growth and development of enterprises across different sectors.

Investment Services: The company offers investment advisory services to assist clients in making informed decisions regarding their financial portfolios. These services are backed by expert insights and market research, ensuring that clients can optimize their investment strategies.

Digital Banking: In line with the evolving technological landscape, LBFL has embraced digital innovation to provide convenient and accessible banking solutions. Through online and mobile banking platforms, customers can manage their accounts, conduct transactions, and access services from the comfort of their homes.

Insurance Solutions: Recognizing the importance of risk mitigation, LBFL collaborates with reputable insurance providers to offer insurance products, including life and health coverage, ensuring that customers are protected against unforeseen circumstances.

LankaBangla Finance Limited's journey from its inception to its status as a leading financial institution in Bangladesh is a testament to its dedication, innovation, and unwavering commitment to customer satisfaction. With its comprehensive range of financial services, customer-centric approach, and contributions to societal betterment, LBFL continues to shape the

financial landscape of Bangladesh and stands as a symbol of reliability and trust in the realm of financial services.

# Objectives of the Project

The primary objective of implementing an online financial services platform for LankaBangla Finance Limited (LBFL) is to seamlessly transition from manual, in-person processes to a modern and user-friendly website. This strategic initiative aims to harness the power of digital technology to enhance customer experience, streamline operations, and achieve broader organizational goals. The following objectives outline the key outcomes sought through the successful implementation of the online platform:

**Enhanced Customer Convenience:** The central focus of this project is to provide LBFL's customers with a convenient and hassle-free method of accessing and utilizing financial services. By offering an intuitive website interface, users will be able to perform a range of financial transactions, such as account management, loan applications, fund transfers, and investment inquiries, from the comfort of their homes or offices.

**Efficiency and Streamlined Operations:** The online platform aims to optimize LBFL's internal processes by automating various tasks that were previously performed manually. By implementing digital workflows for account opening, loan processing, and other services, the organization can achieve higher operational efficiency, reduce paperwork, and minimize processing time.

**Expanded Service Reach:** With the online platform, LBFL can extend its services beyond physical branch locations. Geographical constraints will no longer limit the accessibility of financial services, allowing the organization to tap into previously untapped markets and cater to a wider customer base.

**Personalization and Customization:** The website can be designed to offer personalized experiences for each user. By analyzing user behavior and preferences, LBFL can present relevant financial products, investment opportunities, and advisory services tailored to individual needs, thereby enhancing customer engagement and satisfaction.

**Data Security and Privacy:** Ensuring the security and confidentiality of customer data is a paramount objective of the online platform. Implementing robust encryption, multi-factor authentication, and stringent data protection measures will instill trust among customers and mitigate potential security risks.

**Financial Inclusion and Accessibility:** The online platform aligns with LBFL's commitment to financial inclusion. By offering digital financial services, LBFL can cater to individuals who may have limited physical access to traditional banking facilities, contributing to broader financial inclusion goals.

**Real-time Monitoring and Reporting:** The platform can provide real-time insights and reports to LBFL's management, enabling data-driven decision-making. The availability of accurate, up-to-date information will facilitate strategic planning, risk assessment, and performance evaluation.

**Adaptation to Technological Trends:** The implementation of an online platform positions LBFL as an industry leader that embraces technological advancements. By staying abreast of emerging digital trends, LBFL can remain competitive and relevant in a rapidly evolving financial landscape.

**Sustainability and Future Growth:** The online platform lays the foundation for LBFL's sustainable growth by attracting tech-savvy customers and enhancing its market presence. As customer preferences shift towards digital channels, LBFL can capitalize on this trend to establish a strong online brand and ensure long-term viability.

## Scope of the project

The scope of the project to implement an online financial services platform for LankaBangla Finance Limited is comprehensive and encompasses various aspects of design, development, implementation, testing, and ongoing maintenance. The scope outlines the specific tasks, functionalities, and deliverables required to successfully execute the project. Here is an overview of the project scope:

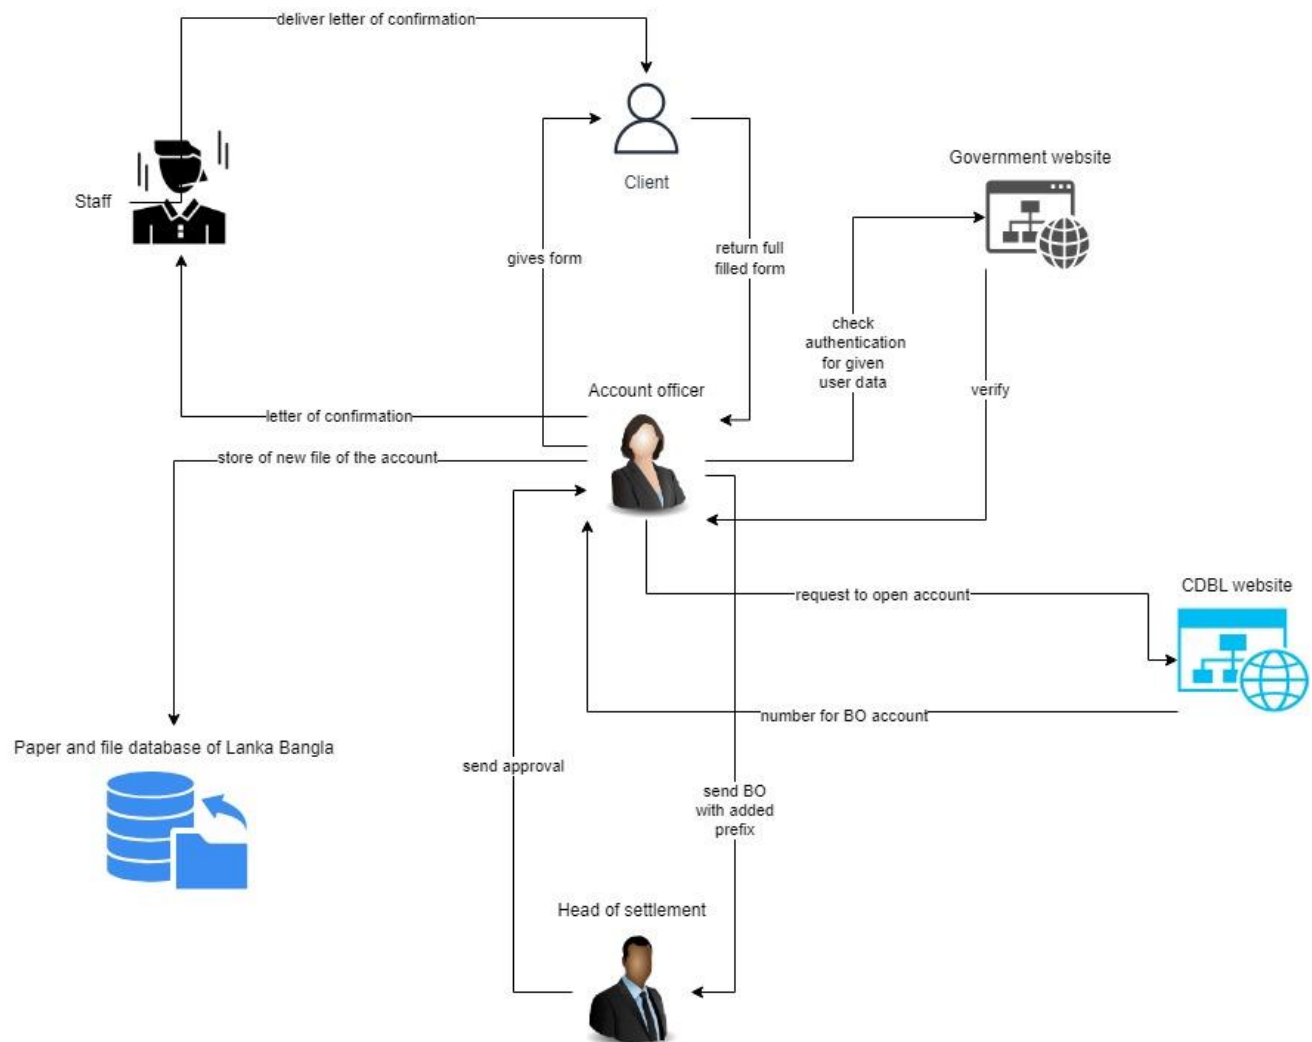

- **Website Development and Design**
  - **Functionality and Features**
- **Backend Development and Integration**
  - **Security and Compliance**
  - **Testing and Quality Assurance**
    - **Training and Support**
  - **Deployment and Launch**
  - **Monitoring and Maintenance**
  - **Data Analytics and Reporting**
- **Future Enhancements and Scaling**

The successful completion of this project will lead to the establishment of a robust and user-centric online financial services platform for LankaBangla Finance Limited, positioning the organization as a frontrunner in the digital transformation of the financial industry in Bangladesh.

## CHAPTER 2: REQUIREMENT ANALYSIS

## **Problem Analysis**

PROCESS NAME	EXISTING SYSTEM PROBLEMS	PROPOSED SOLUTIONS
Developing an online service for LankaBangla Finance Limited	Customers needed to visit the finance office to get their forms, from the accounts officer in order to register.	Providing an online service platform would allow the customer to register from their residence without facing the hassle of travelling to their designated offices.
Developing a cloud storage solution for file database system.	Customer's data/information are stored in a file database, where they faced issues with security and loss of data.	Providing a cloud storage solution to safeguard the customer's data/information to ensure security and back up data.
Automation of system which verifies the data and notifies the client when verification is complete.	Account officer needed to manually input the data in the government website of the customer and then had to wait for letter confirmation which was later passed on by a staff.	Online form is automatically submitted to government website where it checks the user data and is later verified by the accounts officer, and the user gets notified by email/text.
Automation of verification and approval of BO number.	After verification from the government website, the officer will request to open an account on the CDBL website. Which then sends a BO number for an account.  It is then later sent to the Head with added prefix for approval and then sent back to the officer to confirm it to the client.	After verification from the government website, the LankaBangla website will send verified data to the CDBL website to open an account. It will then send this information back to the LankaBangla website which will then send the BO account with added prefix

		to the Head for approval and then notify the client.
--	--	---

## CHAPTER 3: LOGICAL SYSTEM DESIGN

### Business Rule

LankaBangla Finance Limited's overarching goal from the implementation of the online financial services platform is to position itself as a leading, customer-centric digital financial services provider in Bangladesh. The company aims to leverage technology to enhance its offerings, streamline operations, and create a significant positive impact on its customers, the industry, and its own growth trajectory. Specifically, LankaBangla Finance Limited's goals can be outlined as follows:

**Digital Transformation Leadership:** LBFL aims to become a pioneer in the digital transformation of the financial industry in Bangladesh. The company's goal is to lead the way in adopting advanced technology to provide modern, convenient, and secure financial services to its customers.

**Enhanced Customer Experience:** The primary focus is on delivering an exceptional and seamless user experience to customers. LBFL aims to provide user-friendly online tools and services that cater to the needs of its diverse customer base, fostering strong customer loyalty and satisfaction.

**Market Expansion and Inclusion:** LBFL seeks to expand its market reach by tapping into segments that might have been underserved or inaccessible due to geographical

limitations. The online platform's accessibility can contribute to greater financial inclusion, reaching individuals and businesses beyond traditional branch locations.

**Operational Efficiency:** By automating manual processes and integrating digital workflows, LBFL intends to achieve higher levels of operational efficiency. This includes faster processing times, reduced paperwork, and streamlined internal processes.

**Innovation and Agility:** LBFL aims to establish itself as an innovative financial institution that continuously evolves its services based on customer needs and emerging industry trends. The platform provides a foundation for future technological advancements, such as integrating AI-driven services and enhancing mobile app capabilities.

**Data-Driven Decision Making:** The online platform will generate valuable data insights about customer behavior, preferences, and usage patterns. LBFL's goal is to utilize this data for informed decision-making, refined marketing strategies, and the development of new financial products.

**Brand Modernization and Differentiation:** Through the implementation of the online platform, LBFL aims to reposition its brand as forward-thinking, modern, and responsive to technological advancements. The platform can differentiate LBFL from competitors and attract tech-savvy customers.

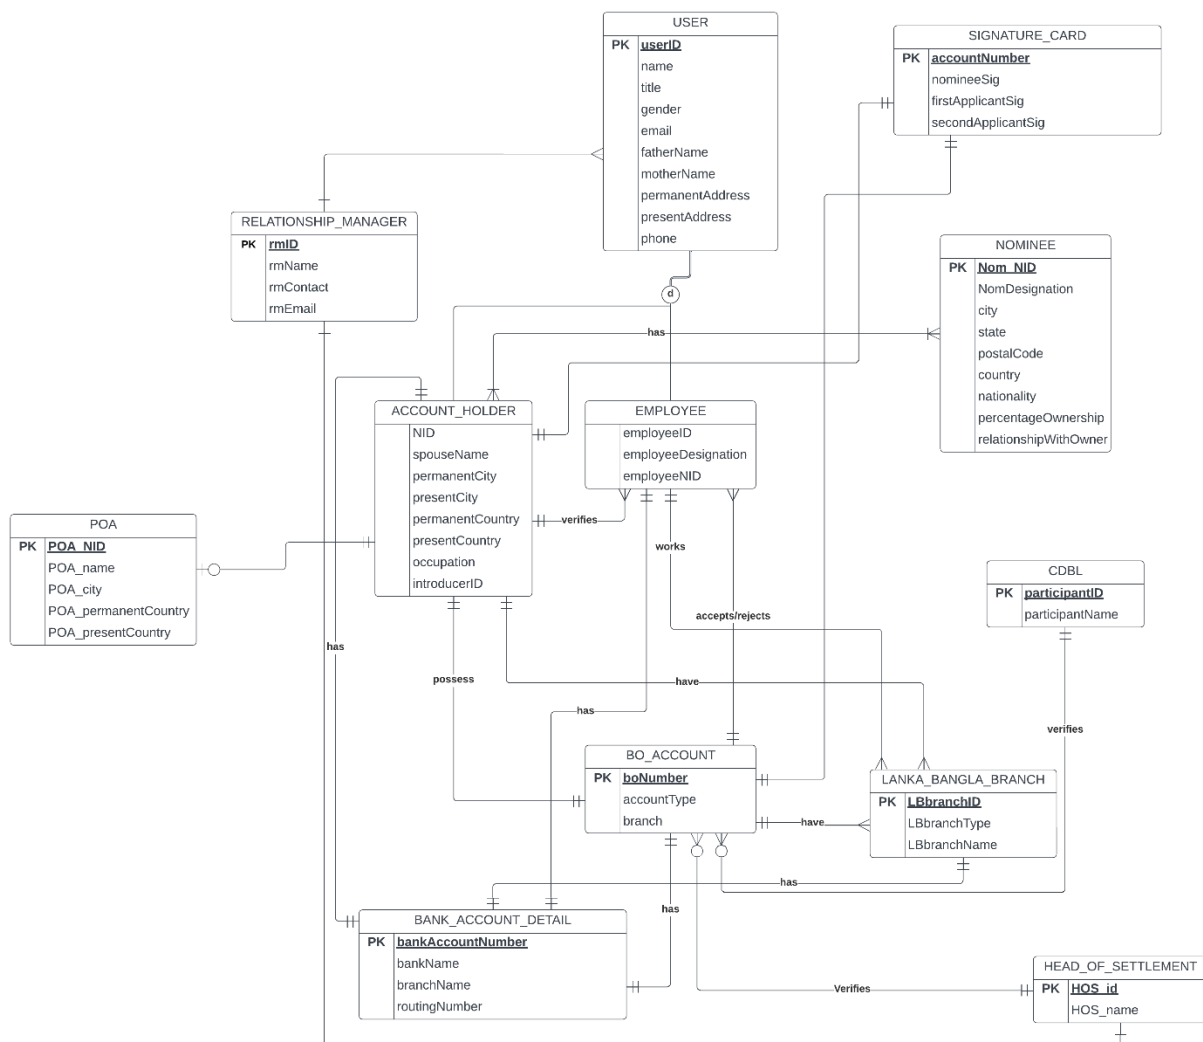

**Financial Growth and Sustainability:** LBFL aims to drive revenue growth through the platform by offering value-added services, attracting new customers, and increasing customer engagement. This growth contributes to LBFL's long-term sustainability and financial success.

**Customer Education and Empowerment:** LBFL's goal is to empower customers with financial knowledge and tools. The platform can offer educational resources, calculators, and investment insights to help customers make informed financial decisions.

**Risk Management and Compliance:** The platform allows LBFL to maintain a strong focus on risk management and compliance. By adhering to data security regulations and financial industry standards, LBFL aims to ensure the safety and trust of its customers.

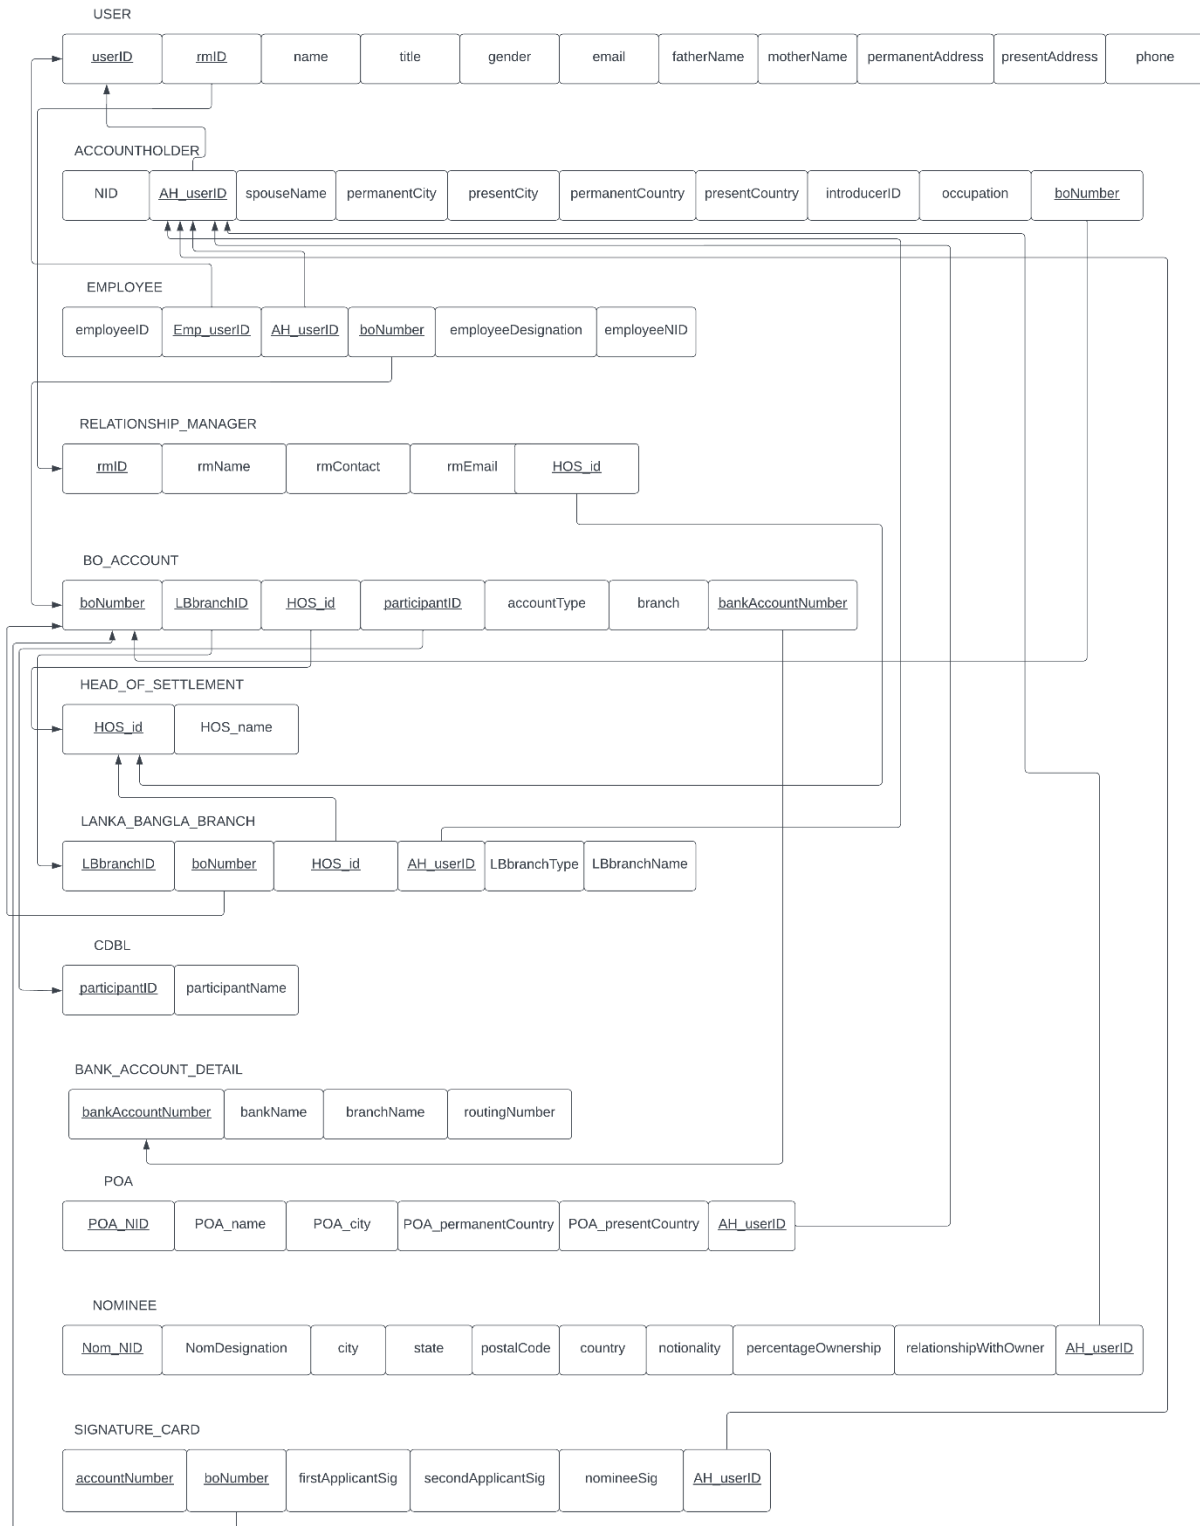

In summary, LankaBangla Finance Limited's overarching goal is to leverage the implementation of the online financial services platform to transform its operations, provide unparalleled customer experiences, and solidify its position as a digital leader in the financial industry in Bangladesh. Through this initiative, LankaBangla Finance Limited seeks to achieve growth, innovation, and enduring customer relationships.

## B. Output Form:

SQL:

The screenshot shows the MySQL Workbench interface with the 'Structure' tab selected. It displays a list of 12 tables in the 'lanka\_bangla database'. Each table entry includes a checkbox, the table name, a star icon, a 'Browse' button, and icons for 'Structure', 'Search', 'Insert', 'Empty', and 'Drop'. The table details are as follows:

Table	Action	Rows	Type	Collation	Size	Overhead
<input type="checkbox"/> accountholder	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	32.0 KiB	-
<input type="checkbox"/> bank_account_detail	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> bo_account	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> cdbi	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> employee	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	32.0 KiB	-
<input type="checkbox"/> head_of_settlement	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> lanka_bangla_branch	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> nominee	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> poa	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> relationship_manager	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> signature_card	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
<input type="checkbox"/> user	★ Browse Structure Search Insert Empty Drop	0	InnoDB	utf8mb4_general_ci	16.0 KiB	-
12 tables	Sum	0	InnoDB	utf8mb4_general_ci	224.0 KiB	0 B

At the bottom, there is a checkbox for 'Check all' and a dropdown menu set to 'With selected:'.

The screenshot shows a code editor with a dark theme. The Explorer panel on the left shows a project structure for 'LANKABANGLA' with folders like 'css', 'fontawesome-free-6...', 'images', and 'LankaBangla'. The main editor area displays the code for 'login.php'. The code includes variable assignments for email and password, validation checks for empty fields, a database query to verify user credentials, and session management. The status bar at the bottom indicates 'Ln 9, Col 22', 'Spaces: 4', 'UTF-8', 'CRLF', 'PHP', and 'Go Live'.

```
login.php
22 $users_email      = $_POST['users_email'];
23 $users_password   = $_POST['users_password'];
24
25
26
27 if(empty($users_email)){
28     $emailmsg = 'Enter an email.';
29 }else{
30     $emailmsg = '';
31 }
32
33 if(empty($users_password)){
34     $passmsg = 'Enter your password.';
35 }else{
36     $passmsg = '';
37 }
38
39 if(!empty($users_email) && !empty($users_password)){
40     $sql = "SELECT * FROM user WHERE email='users_email' AND user_password = 'users_password'";
41     $result = mysqli_query($conn, $sql);
42     $val=mysqli_num_rows($result);
43
44     if($val==1){
45         $row = mysqli_fetch_assoc($result);
46
47         $userID = $row['userID'];
48         $name = $row['name'];
49         $title = $row['title'];
50         $gender = $row['gender'];
51         $email = $row['email'];
52
53         $_SESSION['userID'] = $userID;
54         $_SESSION['name'] = $name;
55         $_SESSION['title'] = $title;
56         $_SESSION['gender'] = $gender;
57         $_SESSION['email'] = $email;
58     }
59 }
```

## Chapter 5: CONCLUSION

### Problems And Solutions :

Building upon project on Lanka Bangla developers, most of the work assumptions and queries were made while working on the rich picture and six element analysis of operations of the organization as there was no discreet data present or sufficient resources. For a better understanding scenario and to overcome such confusions, interviews were made.

Based upon descriptive research created entities were kept at their Significant levels, which was also introduced in ERD & Relational Schema schematic. Instructor's feedback and our group discussions played a very valid role here as well.

All the Software System Requirement's reached successfully!

Front-End Developing tools: HTML, CSS .

Back End Developing tools: PHP.

### Additional Features And Future Development :

1. **Digital Banking:** Many financial institutions worldwide are expanding their digital footprints to cater to a younger, tech-savvy demographic. This includes mobile banking apps with features like digital wallets, real-time account tracking, and online customer service.

2. **Financial Inclusion:** In many developing countries, a significant part of the population remains unbanked. Financial products targeting these segments, often leveraging mobile technology, can be a significant growth avenue.
3. **Cybersecurity:** With the increasing digitization of financial services, cybersecurity has become paramount. Financial institutions are continuously looking to bolster their cyber defenses and develop best practices in this domain.
4. **Partnerships and Collaborations:** Many traditional financial institutions are looking to collaborate with fintech startups to leverage their innovative solutions and deliver enhanced services to their clients.
5. **Training and Development:** To keep up with the rapid pace of change, financial institutions are investing in training their workforce in emerging technologies and new industry trends.
